

Empty CDKey

Players who are getting "Empty CDKey" messages trying to connect to PunkBuster ET Servers may attempt a manual CDKey registration.

Evenbalance decided to stop all services for our loved game Wolfenstein Enemy Territory
This spoils new player to join PunkBuster enabled server

Currently 2 ways to install an etkey are available:

- 1.) You can use PB Installer, which also creates an etkey files if needed
- 2.) You can create your ETKEY [here](#) and copy it by yourself into the right directory

How to install this etkey?

After you created an etkey and downloaded it, you need to place the file (filename "etkey", without extension) in the right directory

Windows XP Place the downloaded etkey file in your etmain folder

Windows Vista * Place the etkey in User->AppData->Local->Punkbuster->ET->etmain (create the folder if it not exists)

Windows 7 * Place the etkey in User->AppData->Local->Punkbuster->ET->etmain (create the folder if it not exists)

* Remark By default the folders are hidden, you need to make them visible How this work?

Linux Place the etkey file in ~/.etwolf/etmain/

MacOS

Place the etkey file in

~/Library/Application Support/Wolfenstein ET/etmain
