

How to make a ETpro Trickjump Server!!

Enemy Territory Etpro 3.2.6 Server for a Trickjump Server!

This stuff you gotto change:

- 1.ETServer with Startparameter +fs_game etpro starten
- 2.Write the next Variablen in the server.cfg

Trickjump - Setting:

```
set g_userTimeLimit "100000"  
set g_useralliedrespawntime "1"  
set g_useraxisrespawntime "1"  
set g_MedicChargeTime "1"  
set g_heavyWeaponRestriction "0"  
set g_friendlyFire "0"  
set pmove_fixed "0"  
set pmove_msec "8"  
set b_fallingbugfix "1"  
set b_fixedphysics "0"  
set b_fixedphysicsfps "125"
```

You can set pmove by hand in the server

Skills

```
set b_defaultskills "4 0 4 0 0 0 0"
```

Battlesense/Medic Level 4

Voting

important is nextmap and timelimit

Then we have the LUA-Module:

Adrenaline Change:

More Adrenaline for Medics which is great for Trickjump Servers

/save und /load Funktion:

put the .lua in ETPro directory, Then put in server.cfg : set lua_modules "tjmod.lua adrenaline.lua" <- Script Name
